Pathways around Charles Morris Residences and the School of Earth and Environment will be closed.

21 September 2019 – May 2020

We are carrying out a significant project to waterproof a major electrical substation that provides power to the campus. The £2m improvements works are part of the University’s aim to update the electrical infrastructure that supports campus facilities and buildings. This means the pathways around Charles Morris Residences and the School of Earth and Environment will be closed for eight months.

No access

Accessible alternative walking route to Chancellors Court and Leeds University Union.
